

# Windows DNS Reverse Zone

## 1 Text - Config Module

**Below is an example of YAML to modify**

```
"windows_dns::zones":  
  '#{subnet.inAddrArpa}':  
    ensure: "present"  
"windows_dns::records":  
  '#{int in subnet.nics}':  
    '#{int.ip}_PTR':  
      ensure: 'present'  
      type: 'PTR'  
      node: '#{int.ip}'  
      value: '#{int.vm.name}.$#{domain.name}'
```
